

Middlesex County Public Schools recently entered a partnership with SchoolMessenger®, a company used by the nation's leading school systems to connect with parents, students, staff, and the broader community through voice, SMS text, email and social media. The service is proven to positively impact academic achievement, increase parent involvement, reduce absenteeism and dropouts, and save staff time. It comes with rock solid infrastructure and is available, 24x7x365.

As Middlesex County Public Schools no longer uses the Instant Alert Message System, families will not need to login to a website to access or change information. SchoolMessenger® uploads contact information from our school division's database each day.

To ensure that you receive school communications, please make certain that your child's school has a current phone number. Also, if you would like to receive email and/or SMS text alerts, provide an email and/or mobile number.

We hope that you will find SchoolMessenger® to be an easy and convenient way to receive school information. For more information, please visit [www.schoolmessenger.com](http://www.schoolmessenger.com).
